KUSHANI C P DE SILVA

No. 21, Golden Valley, Godakanda, Galle 80000, Sri Lanka
+94 76 990 4840 | smkcpdesilva@gmail.com | Linkedin | Github

Cybersecurity student with 7+ certifications, including Fortinet FCF and Mastercard/TATA virtual programs. I offer a technical foundation in Linux, Python, and security frameworks, combined with experience in machine learning and networking. I am driven to translate academic theory into real-world defense strategies, specifically looking to contribute to high-stakes technology projects through a hands-on internship.

EXPERIENCE

WINTER INTERN (SOFTWARE & DIGITAL OPERATIONS)

Easy Cloud | Hyderabad, India

DEC 2024 – JAN 2025

Explored and experimented with 3+ AI tools and automation solutions to support productivity and technical experimentation. Assisted with 5+ digital marketing campaigns, helping with content preparation, campaign research, and basic performance tracking. Collaborated with team members and gained exposure to cloud-based and ERP-oriented solutions in a professional development environment.

EDUCATION

BSc (hons) in Information Technology specializing in Cyber Security

Sri Lanka Institute of Information Technology

2024-2028

- Current CGPA: 3.43/4.0
- Dean's List – 2nd Year, 1st Semester

President's Girls' College - Galle

2011- 2024

- GCE Advanced Level – 2023(2024)
  French (B), Information & Communication Technology (B), Western music (B),
  General English (A) , General Information Technology (A)

PROJECTS

SOC Simulation Lab – SIEM Deployment & Threat Detection LINK

- Built an isolated VMware lab with Wazuh SIEM to detect SSH brute force attacks in real-time.
- Implemented syslog forwarding from Kali Linux, alert correlation, and mapped findings to NIST CSF 2.0 and MITRE ATT&CK T1110.001.
- Produced executive and technical reports with risk register, IoC tracking, and framework-aligned mitigation recommendations.
- Stack: Wazuh 4.7.5, Ubuntu 22.04, Kali Linux, NIST CSF, MITRE ATT&CK.

AutoReconLite – Reconnaissance & Vulnerability Scanner LINK

- Built an advanced Bash-based penetration testing framework automating common reconnaissance tasks with modular design and CLI interface.
- Implemented TCP SYN scanning, service detection, OS fingerprinting, and vulnerability scanning using Nmap NSE scripts.
- Developed automated report generation, multiple scan modes (quick/full), color-coded terminal output, and scan logging for auditing.
- Stack: Bash, Nmap, Linux CLI tools.

RedScan CLI – Web Vulnerability Scanner LINK

- Developed a beginner-friendly, red-team style web vulnerability scanner in Python, tested against ~OWASP Juice Shop.
- Implemented HTTPS detection, security header analysis, basic port scanning, and simple vulnerability checks with CLI-based terminal output.
- Designed a modular scanning framework with structured scan reporting for future expansion.
- Stack: Python (Requests, Socket, argparse), OWASP Juice Shop for testing.

Household Electricity Peak Forecasting – Machine Learning & Analytics LINK

- Developed a predictive framework for peak demand using ~2 million records from the UCI repository. Built a preprocessing pipeline with missing value interpolation, IQR outlier detection, and PCA.
- Evaluated LSTM, SVR, and Decision Tree models, achieving a 0.998 R^2 score via Random Forest.
- Stack: Python (TensorFlow, Scikit-learn, Pandas, Matplotlib).

VOLUNTEERING

- **Campus Ambassador :** International MUN | Remote — SEP 2022– OCT 2022
- **Aiesec Global Volunteer** — DEC 2024 –JAN 2025

SKILLS & CERTIFICATIONS

Cybersecurity

- **Linux Unhatched - CISCO** — NOVEMBER 2024
- **Introduction to Cybersecurity- CISCO** — JANUARY 2026
- **Introduction to the Threat Landscape 3.0 – Fortinet** — JANUARY 2026
- **Technical Introduction to Cybersecurity 3.0 – Fortinet** — FEBRUARY 2026
- **Fortinet Certified Fundamentals Cybersecurity – Fortinet** — FEBRUARY 2026
- **Introduction to Critical Infrastructure Protection - OPSWAT Academy** — FEBRUARY 2026
- **ISO/IEC 27001:2022 INFORMATION SECURITY ASSOCIATE™- SKILLFRONT** — FEBRUARY 2026
- **Foundations of Operationalizing MITRE ATT&CK v13 – AttackIQ** — FEBRUARY 2026
- **SIEM 101 – LetsDefend** — FEBRUARY 2026
- **Network Technician Career Path – CISCO** — MARCH 2026
- **AI In Cybersecurity Fundamentals - Palo Alto Networks** — MARCH 2026

Hands-on Programs

- **Mastercard Cybersecurity Virtual Experience Program On Forage** — FEBRUARY 2026
- **TATA Cybersecurity Security Analyst Job Simulation On Forage** — FEBRUARY 2026
- **OWASP Top 10 2025: IAAA Failures – Try Hack Me** — FEBRUARY 2026
- **Cybersecurity Awareness - Defense Counterintelligence and Security Agency (DCSA)** — MARCH 2026
- **A Practical Introduction to Cloud Computing – codered** — APRIL 2026

Technical Skills

- **Programming & Scripting-**
  - LANGUAGES: Python, Java, C, R , SQL , Bash Scripting
  - VERSION CONTROL: Git
- **Security & Tools –** Kali Linux, Wireshark, Nmap
- **Frameworks -** ISO/IEC 27001 , MITRE ATT&CK v13 , OWASP Top 10

Languages

- **English -** Professional Working Proficiency (Cambridge PET Grade: C | CEFR Level: B1)
- **French -** CEFR Level: B1 | Completed 1st Semester of BA in French at USJP
- **Sinhala –** Native
