KUSHANI C P DE SILVA

No. 21, Golden Valley, Godakanda, Galle 80000, Sri Lanka
+94 76 990 4840 | smkcpdesilva@gmail.com | Linkedin | Github | Portfolio

Cybersecurity undergraduate with 10+ industry certifications and hands-on experience in SIEM deployment, vulnerability scanning, and Python automation. Proven ability to translate academic theory into real-world defense strategies through projects involving Wazuh, Nmap, and Machine Learning. Seeking a challenging internship to contribute to high-stakes technology security projects.

EXPERIENCE

WINTER INTERN (SOFTWARE & DIGITAL OPERATIONS)

Easy Cloud | Hyderabad, India

DEC 2024 – JAN 2025

Explored and experimented with 3+ AI tools and automation solutions to support productivity and technical experimentation. Assisted with 5+ digital marketing campaigns, helping with content preparation, campaign research, and basic performance tracking. Collaborated with team members and gained exposure to cloud-based and ERP-oriented solutions in a professional development environment.

EDUCATION

BSc (hons) in Information Technology specializing in Cyber Security

Sri Lanka Institute of Information Technology

2024-2028

- Current CGPA: 3.43/4.0
- Dean's List – 2nd Year, 1st Semester

President's Girls' College - Galle

2011- 2024

- GCE Advanced Level – 2023(2024)
  French (B), Information & Communication Technology (B), Western music (B),
  General English (A) , General Information Technology (A)

PROJECTS

SOC Simulation Lab – SIEM Deployment & Threat Detection LINK

- Built an isolated VMware lab with Wazuh SIEM to detect SSH brute force attacks in real-time.
- Implemented syslog forwarding from Kali Linux, alert correlation, and mapped findings to NIST CSF 2.0 and MITRE ATT&CK T1110.001.
- Stack: Wazuh 4.7.5, Ubuntu 22.04, Kali Linux, NIST CSF, MITRE ATT&CK.

Vulnerability Assessment Planning Report – Passive Reconnaissance LINK

- Conducted a comprehensive passive reconnaissance assessment on a target application, identifying 13 endpoints (public, hidden, and artifacts) without active exploitation.
- Identified critical risks including publicly accessible admin panels and IDOR vulnerabilities, mapping all findings to OWASP Top 10 2021 standards.

AutoReconLite – Reconnaissance & Vulnerability Scanner LINK

- Developed a modular Bash-based penetration testing framework that automates TCP SYN scanning, service detection, and OS fingerprinting using Nmap NSE scripts.
- Implemented flexible scan modes (quick/full) with automated report generation and audit logging, featuring color-coded CLI output for enhanced usability.
- Stack: Bash, Nmap, Linux CLI tools.

RedScan CLI – Web Vulnerability Scanner LINK

- Developed a modular, red-team style web vulnerability scanner in Python, tested against OWASP Juice Shop to validate detection capabilities.
- Implemented HTTPS detection, security header analysis, and basic port scanning, delivering results via a user-friendly CLI interface.
- Stack: Python (Requests, Socket, argparse), OWASP Juice Shop for testing.

Household Electricity Peak Forecasting – Machine Learning & Analytics LINK

- Developed a predictive framework for peak demand using ~2 million records from the UCI repository. Built a preprocessing pipeline with missing value interpolation, IQR outlier detection, and PCA.
- Evaluated LSTM, SVR, and Decision Tree models, achieving a 0.998 R^2 score via Random Forest.
- Stack: Python (TensorFlow, Scikit-learn, Pandas, Matplotlib).

VOLUNTEERING

- **Campus Ambassador :** International MUN | Remote — SEP 2022– OCT 2022
- **AIESEC Global Volunteer** — DEC 2024 –JAN 2025

SKILLS & CERTIFICATIONS

Cybersecurity

- **Fortinet :** Introduction To The Threat Landscape 3.0 , Technical Introduction To Cybersecurity 3.0 , Fortinet Certified Fundamentals Cybersecurity
- **Cisco :** Network Technician Career Path, Linux Unhatched, Introduction To Cybersecurity
- **Industry Standards:** ISO/IEC 27001:2022 Information Security Associate™ (Skillfront) , Foundations Of Operationalizing MITRE ATT&CK V13 (AttackIQ)
- **Virtual Programs:** Mastercard Cybersecurity Virtual Experience Program On Forage, Tata Cybersecurity Security Analyst Job Simulation On Forage
- **Other:** Introduction To Critical Infrastructure Protection (OPSWAT Academy), SIEM 101 – LetsDefend , AI In Cybersecurity Fundamentals (Palo Alto Networks), A Practical Introduction to Cloud Computing (CodeRed) , Cybersecurity Awareness - Defense Counterintelligence and Security Agency (DCSA)

Technical Skills

- **Programming & Scripting-**
  - LANGUAGES: Python, Java, C, R , SQL , Bash Scripting
  - VERSION CONTROL: Git
- **Security & Tools –** Kali Linux, Wazuh SIEM, Wireshark, Nmap, Burp Suite (Basic), Metasploit
- **Frameworks & Standards -** ISO/IEC 27001 , MITRE ATT&CK v13 , OWASP Top 10, NIST CSF 2.0

Languages

- **English -** Professional Working Proficiency (Cambridge PET Grade: C | CEFR Level: B1)
- **French -** CEFR Level: B1 | Completed 1st Semester of BA in French at USJP
- **Sinhala –** Native
